Please note the information contained in this guide is for the use of competent and qualified heating engineers in the UK. We always recommend attending a training course provided by Vaillant to ensure complete knowledge of the appliance and/or accessories you are installing. The Vaillant Group does not warrant the accuracy or completeness of any of the information provided in this brochure. Should you require any clarification or further information, please speak with your Regional Business Manager or call our technical helpline. The Vaillant Group does not accept liability or responsibility resulting from the installer's failure to comply with the guides or otherwise. For more detailed information, please refer to the installation manual for each product you are using.

About Vaillant

The Vaillant Group

Vaillant UK is proud to be part of the worldwide heating and hot water corporation Vaillant Group, a family-owned business that was founded by Johann Vaillant in his workshop in Remscheid, Germany in 1874.

In 1894, Johann patented a new closed-system gas-fired bathroom boiler. Over the years, Johann's technical innovations continued and in 1924, he launched the world's first central heating boiler. Since these revolutionary inventions, Vaillant continues to drive the evolution of heating technologies, launching the first ever combi boiler in 1967, and the game changing aroTHERM plus in 2020.

Today, Vaillant is still setting the standard in the heating marketplace, developing market leading products that work seamlessly together, to provide a full systems solution. With a growing focus on developing products that use renewable energy, Vaillant became the first boiler manufacturer in the UK to launch a heat pump production line, which opened at their headquarters in Belper, 2022. This, together with the research and development of on-going hydrogen trials, marks a huge milestone for Vaillant in supporting the brands mission to create a better climate, inside each home and the world around it.

Why Vaillant?

The entire uniSTOR high recovery heat pump cylinder range has been designed to work in harmony with Vaillant heat pumps, to provide highly efficient heating and hot water systems.

A uniSTOR's large surface area and smooth coil design maximises heat transfer, to ensure connected Vaillant heat pumps run at their optimum efficiency. This reduces running costs and increases hot water performance.

Ranging from 150 up to 800 litres, our uniSTOR heat pump cylinders are available in both pre-plumbed (150-300 litres only) and standard options, giving you and your customers even more flexibility. In addition to this, the 250 and 300 litre cylinders have an increased coil size making them compatible with a wider range of ground source heat pump systems.

uniSTOR cylinders have a Global Warming Potential (GWP) of less than five. This is thanks to thermal injected insulation, as well as a 100% recyclable stainless steel tank with an ultra hard-wearing outer shell. These elements of the design contribute to a highly efficient and sustainable heating system. What's more, Vaillant cylinders come with a 25-year guarantee on the outer shell, giving extra added peace of mind.

Choosing your perfect solution

Cylinder compatibility matrix chart

The following cylinder compatibility matrix is provided to help guide you during the specification stages of a heat pump system. Vaillant cylinders provide excellent efficiency, durability and ensure optimum system performance when combined with Vaillant heat pumps. For further information and support, please speak to one of our technical advisors on 0330 100 3540.

Pre-plumbed uniSTOR

Overview

The pre-plumbed uniSTOR high recovery heat pump cylinder range comes in 200, 250, and 300 litre capacities. The pre-plumbed range is designed to simplify installation and comes with inline connections and a mounting plate for controls, all sized to accommodate the heat pump interface.

Features & benefits

Includes 28mm three-way valve

Allows cost saving by reducing number of valves.

Factory fitted immersion heater

Emergency backup in case of main heat source failure.

Supplied with expansion vessel and sensor

To provide a complete system solution.

Global Warming Potential less than five and ozone depletion of zero

Designed to have minimal environmental impact.

Large diameter, smooth bore coil technology

Provides quiet operation, reduces build-up of scale and aids in long term efficiency through automatic descaling.

Automatic air vent included

Simplifies installation.

Thermal injected polyurethane insulation combined with vacuum panels

Superior insulation and efficiency.

Adjustable feet

Makes on-site installation easier.

NOTE: The expansion vessel is included with the cylinder. The tundish, three-way motorised valve, and unvented cylinder kit are pre-installed on the cylinder.

Pre-plumbed slimline uniSTOR

Overview

The pre-plumbed slimline uniSTOR high recovery cylinder has been designed with the installer in mind. Its smaller size makes it perfect for space sensitive installations, as well as improving installation times. The cylinder has a specifically designed smooth bore coil, which is purposefully placed to ensure optimum heat transfer within the compact cylinder. The slimline cylinder still offers high performance with a low standby loss of 1.8kW per 24 hours ensuring the hot water stays hot all day long.

Features & benefits

Slim design

Fits into compact spaces allowing for flexible siting.

Thermal injected polyurethane insulation combined with vacuum panels

Superior insulation and efficiency.

28mm three-way valve supplied

Allows cost saving by reducing number of valves.

Factory fitted immersion heater

Emergency backup in case of main heat source failure.

Expansion vessel and sensor included with product

Complete system solution offering.

Global Warming Potential less than five and ozone depletion of zero

Designed to have minimal environmental impact.

Smooth bore coil technology

Provides quiet operation, reduces build-up of scale and aids in long term efficiency through automatic descaling.

Adjustable feet

Simplifies installation.

Non-plumbed uniSTOR

Overview

The non-plumbed uniSTOR high recovery heat pump cylinder is available in 150, 200, 250, and 300 litres. Each cylinder uses the latest thermal injected insulation for the lowest heat losses in its class, with as little as 1kW per 24 hours. The strategically positioned large diameter smooth bore coil provides optimum hot water performance and automatically de-scales to ensure long term efficient hot water generation.

Features & benefits

Heat loss from as low as 1kW/24 hours
Reduce energy bills for homeowners.

Thermal injected polyurethane insulation combined with vacuum panels
Superior insulation and efficiency.

28mm three-way valve supplied
Allows cost saving by reducing number of valves.

Factory fitted immersion heater
Emergency backup in case of main heat source failure.

Expansion vessel and sensor included with product
Complete system solution offering.

Global Warming Potential less than five and ozone depletion of zero
Designed to have minimal environmental impact.

Large diameter, smooth bore coil technology
Provides quiet operation, reduces build-up of scale and aids in long term efficiency through automatic descaling.

Adjustable feet
Makes on-site installation easier.

Large capacity uniSTOR

Overview

The Vaillant cylinder range includes two large capacity cylinders and a complete range of accessories. The 500 and 800 litre models have impressive coil sizes, of 4.7m² and 7m² which are manufactured using high grade stainless steel, and pass the highest Vaillant standards and quality control requirements. In addition, a comprehensive range of accessories are available which includes a choice of unvented cylinder kits, compatible expansion vessels, and a 7.5kW immersion (800 litre only). This provides the installer and specifier with maximum flexibility during design and installation.

Both cylinders can also be easily cascaded to generate higher requirements for hot water. Vaillant's dedicated technical designers can advise on any project for additional support and peace of mind.

Features & benefits

Single guarantee for all components

Complete peace of mind from one manufacturer.

Large diameter, smooth bore coil technology

Provides quiet operation, reduces build-up of scale and aids in long term efficiency through automatic descaling.

Global Warming Potential less than five and ozone depletion of zero

Designed to have minimal environmental impact.

In-built lifting eye

Easy to move over any terrain.

Unvented cylinder kit, expansion vessel and sensor available as an accessory

Complete system solution offering whilst meeting all building regulations.

Factory fitted T & P valve

Ensures safety requirements to meet regulations.

Large 7.5kW single phase immersion available

Emergency backup in case of main heat source failure (800 litre only).

Inspection port included

Meets requirement of many commercial specifications (800 litre only).

Large capacity auroSTOR

Overview

The large capacity 500 litre twin coil auroSTOR cylinder has been specifically designed to accommodate both a heat pump and solar thermal system. The 500 litre twin coil auroSTOR cylinder utilises two smooth coils to ensure a quick heat recovery and prolonged life, due to its automatic de-scaling properties.

auroSTOR has a multitude of accessories to complete the Vaillant system including a choice of unvented cylinder kits and a compatible expansion vessel.

auroSTOR completes a Vaillant renewable system by enabling solar thermal options.

Features & benefits

Single guarantee for all components

Complete peace of mind from one manufacturer.

Global Warming Potential less than five and ozone depletion of zero

Designed to have minimal environmental impact.

Unvented cylinder kit, expansion vessel and sensor available as an accessory

Complete system solution offering whilst meeting all building regulations.

— 1.0 m² (Ø22 mm) = uniSTOR 150 litre and auroSTOR 500 litre (lower coil)

— 1.4 m² (Ø22 mm) = uniSTOR 200 litre

— 2.4 m² (Ø22 mm) = uniSTOR 250 litre

— 2.8 m² (Ø22 mm) = uniSTOR 300 litre

— 2.3 m² (Ø35 mm) = auroSTOR 500 litre (upper coil)

— 4.7 m² (Ø25.4 mm) = uniSTOR 500 litre

— 7.0 m² (Ø25.4 mm) = uniSTOR 800 litre

Industry leading training for industry leading engineers

Training

At Vaillant, we pride ourselves on being at the forefront of technology and sharing our expertise. That's why, we offer a wide range of training courses to help support our installers and their businesses. Whether you're looking for online, practical or accredited courses, we can help find the right training journey for you.

Why train with us?

Nationwide training facilities

We have 8 training facilities across the UK, all of which are equipped with industry-leading products to support your learning.

341 years of expertise

The training team have hundreds of years combined expertise between them, so you can rest assured that you're learning from the best in the business.

Hands-on learning

We strive to deliver a practical approach to training, with live boilers and heat pump installations for you to work on at every one of our centres of excellence.

Courses for all skill levels

We provide training for all skill levels, from apprentices right through to experienced engineers.

Loyalty rewards

Earn Advance rewards such as cashback, credits and exclusive invites to events when you train with us.

Ongoing support

Our training team are committed to sharing knowledge, experience and content to support you throughout your Vaillant training journey.

Service and spares support

Spares and support, year after year

Vaillant is committed to responsible spares provision and provides spares for a minimum of 15 years after production ceases. We have a nationwide network of genuine spares stockists and a dedicated spare parts team to help you identify the parts you require.

Vaillant has even developed an app that helps identify spare parts to make ordering easier. Simply search for Vaillant on Google Play or the App Store.

Service you can count on

At Vaillant UK, we invest as much of our resources into our service and support as we do in creating our outstanding heating solutions. So you can rest assured that when you choose a Vaillant product, you will be supported by the best service in the industry. Vaillant has specialist teams available to support installers and end-users with all enquiries. We pride ourselves on the efficiency of our service departments, supported by online tools that allow our customers to book appointments for our services for added convenience.

Vaillant has over 250 service engineers. This includes the largest specialist fleet of renewable and commercial systems engineers in the UK. With phone operators available 364 days a year, service and support from Vaillant UK is never far away.
